Clean Claiming

Clean claims for reliable online licensing

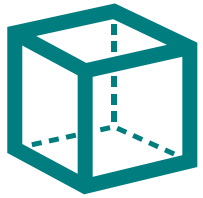

GetOn

1 Previously: All GEMA stakeholders were considered authoritative

In the **GEMA work documentation,** all parties registered for the work — authors and publishers — were previously considered authoritative.

2 With ICE: Only unambiguous claims are considered online

A **claim** only counts if it is unambiguously authorized. Publishers report only the authors they represent. Other jointly reported GEMA authors are notified and can confirm their own share.

3 What now?

Unpublished / not represented: Register the work online yourself and authorize your own share
Published / represented? Inform and coordinate with the publisher: submit it yourself or let the publisher submit it

Important: Please process the work confirmation as quickly as possible.
Otherwise, online licensing may already be completed before the claim is authorized. Offline categories, including video on demand, are not affected.
